BOLLA⁸ POP Shelving

Shelves done at a **POP** of your fingers.

Configure space with color and geometric form. Bolla Pop Shelving is both a storage system and a room divider. Great selection of colors available to suit any environment. Shelves done differently. Bolla Pop shelving is an amazing combination of geometry and physics. Inner panels coil in and the natural compressive force holds the shelving system together without a single tool. Bolla packs flat for shipping, very light weight and it can be assembled in minutes. Designer: David Winston. Made in USA

Patent # 70352-00002

Height: 68" Width: 48" Depth: 16"
