

E-333

MINI DEHUMIDIFIER

KEY MINI DEHUMIDIFIER POINTS:

- Absorbs 4-6 oz of moisture
- Works in a 333 cubic ft. area
- Space saving
- 100% renewable
- Lasts up to 10 years
- No batteries or cords required
- Spill and mess free
- Approx 10-12 hours to renew the unit
- Child and pet safe
- Eco-Friendly

The mini dehumidifier has been designed to absorb moisture from small enclosed areas. It will help protect clothes and valuables from the damaging effects of mold/mildew and moisture rot. It is 100% renewable and needs no power to operate. Place the Eva-Dry unit in a closet or any small, enclosed space, and it will start to absorb moisture immediately.

EFFECTIVE INNOVATION TO ELIMINATE DAMPNES:

There is an indicator window with special "Color Changing Crystals" that change from blue (when dry) to pink (when wet) to indicate when the unit needs to be "renewed". The unit will absorb approx. 4-6 ounces of moisture (depending on humidity levels this should take approx. 3-5 weeks). Once the moisture has been absorbed it cannot leak or spill. This unit uses a specially engineered, crystallized silica gel that is odorless, non-toxic, Eco-Friendly and completely safe.

INSTRUCTIONS:

When the "Color Changing Crystals" turn pink it is time to "renew" the unit. Simply remove the unit from where it is and plug it into a power outlet in a well ventilated area (patio, garage, outside area, etc.). The worldwide-patented technology will warm the crystals allowing them to expand and release the moisture as water vapor into the outside air. It takes about 10-12 hours to completely "renew" the unit. When it is completely renewed the indicator crystals will change back to blue and the unit is ready to absorb another 4-6 ounces of moisture. The crystals will remain active for 10 years if used correctly, and we offer a 5-year limited manufactures warranty on all E-333 units.
